## Catalog \#: EAB10105

| Host/lsotype | Clonality | Applications | MW (kDa) | Reactivity |
| :--- | :---: | :---: | :---: | :---: |
| Mouse IgG1 | Monoclonal | WB, IHC-P | 30 | Human, Mouse, Rat |

## Applications Dilutions

The application notes include recommended starting dilutions; optimal dilutions/concentrations should be determined by the end user.

| WB(Western Blotting) | $1: 1000-5000$ |
| :--- | :--- |
| IHC-P(Immunohistochemistry-Paraffin) | $1: 50-300$ |

## Product Information

Conjugate
Specificity
Purification
Concentration
Format
Formulation
Shipping
Storage
UniProt ID
Entrez-Gene Id

## Unconjugate

AMPK $\beta 2$ Mouse Monoclonal Antibody detects endogenous levels of AMPK $\beta 2$ protein.
Affinity purification
$1 \mathrm{mg} / \mathrm{ml}$
Liquid
In PBS, pH 7.4, Containing 0.02\% sodium azide, 0.5\% BSA and 50\% Glycerol
Gel Pack
Store at $-20^{\circ} \mathrm{C}$ least 1 year from the date of shipment. Avoid repeated freeze/thaw cycles. Aliquots may be stored at $+4^{\circ} \mathrm{C}$ for $1-2$ weeks
043741
5565

## Product Descriotion

The protein encoded by this gene is a regulatory subunit of the AMP-activated protein kinase (AMPK). AMPK is a heterotrimer consisting of an alpha catalytic subunit, and non-catalytic beta and gamma subunits. AMPK is an important energy-sensing enzyme that monitors cellular energy status. In response to cellular metabolic stresses, AMPK is activated, and thus phosphorylates and inactivates acetyl-CoA carboxylase (ACC) and beta-hydroxy beta-methylglutaryl-CoA reductase (HMGCR), key enzymes involved in regulating de novo biosynthesis of fatty acid and cholesterol. This subunit may be a positive regulator of AMPK activity. It is highly expressed in skeletal muscle and thus may have tissue-specific roles. Multiple alternatively spliced transcript variants have been found for this gene.
